

The background of the entire page is a detailed technical drawing of a scooter brake disc. It features a central circular hub with a series of spokes radiating outwards to a larger outer ring. The outer ring has a complex, multi-lobed shape with various cutouts and mounting points. The drawing is rendered in white lines on a dark background, with some areas highlighted in red. The text "BRAKE DISCS" is in a smaller, bold, sans-serif font, while "SCOOTER" and "BRENTA" are in a much larger, bold, sans-serif font. The text is positioned in the lower-left quadrant of the image.

BRAKE DISCS SCOOTER BRENTA

designed in italy

2.102

ABOUT US

ITA

Frenotecnica nasce nel 1983 come piccolo laboratorio artigiano per la volontà di Silvano Stenech e di suo figlio Davide, ed in breve tempo diventa una vera e propria realtà produttiva, specializzata nella progettazione e realizzazione di materiali d'attrito innovativi, performanti e 100% MADE IN ITALY.

Lo stabilimento ha sede in Rovereto, dove possiamo trovare tutte le competenze umane e tecnologiche per gestire sia tutto il processo produttivo che lo sviluppo di nuovi ed innovativi materiali frenanti; infatti qui possiamo trovare sia un moderno reparto R&D che quello dedicato al controllo della qualità, necessario a garantire la massima sicurezza di tutti i prodotti realizzati.

Sfruttando il suo know-how di oltre 40 anni nel settore motociclistico e, grazie anche ad una solida collaborazione con i principali player del settore sia OEM che aftermarket, nel 2005 è nato il marchio BRENTA.

Nel 2022 Endurance Overseas, l'holding company europea del Gruppo Endurance, ha avviato uno sfidante progetto industriale «made in Italy» nel settore delle due ruote, acquisendo Frenotecnica ed il suo brand BRENTA, insieme ad altri marchi ed aziende italiane con una forte tradizione nella produzione di componentistica performante dedicata alle moto. Ecco quindi che il brand inserisce nel proprio catalogo una linea completa di DISCHI FRENO dedicati al mondo SCOOTER. Il moderno processo produttivo permette di ottimizzare alcune delle fasi durante la realizzazione dei dischi, per i quali vengono utilizzati materiali di qualità (acciaio AISI 420 trattato termicamente).

Il design esclusivo permette un peso ridotto (quindi minore massa volante) ed una importante resistenza alla deformazione assiale, che si traducono in un'assenza di fastidiose vibrazioni ed un feeling nella frenata ottimale, permettendo di arrivare ad un prodotto che ha un rapporto qualità/prezzo tra i più interessanti sul mercato.

Abbiamo raggiunto l'obiettivo di offrire un ricambio dalla frenata modulabile e progressiva, unita ad un'ottima durata e costanza di rendimento; tutto questo lo si può apprezzare al meglio quando i nostri dischi freno vengono usati in accoppiata alle nostre pastiglie freno originali BRENTA.

ENG

Frenotecnica was established in 1983 as a small workshop by Silvano Stenech and his son Davide, and in a short time it became a real production reality, specializing in the design and manufacture of innovative, high-performance and 100% MADE IN ITALY friction materials.

The production plant is located in Rovereto and it encompasses all human and technological skills required to manage in-house the entire production process as well as the development of new and innovative braking materials; in fact the company has a modern R&D department and a strict quality control system, necessary to guarantee the maximum safety of all the products manufactured.

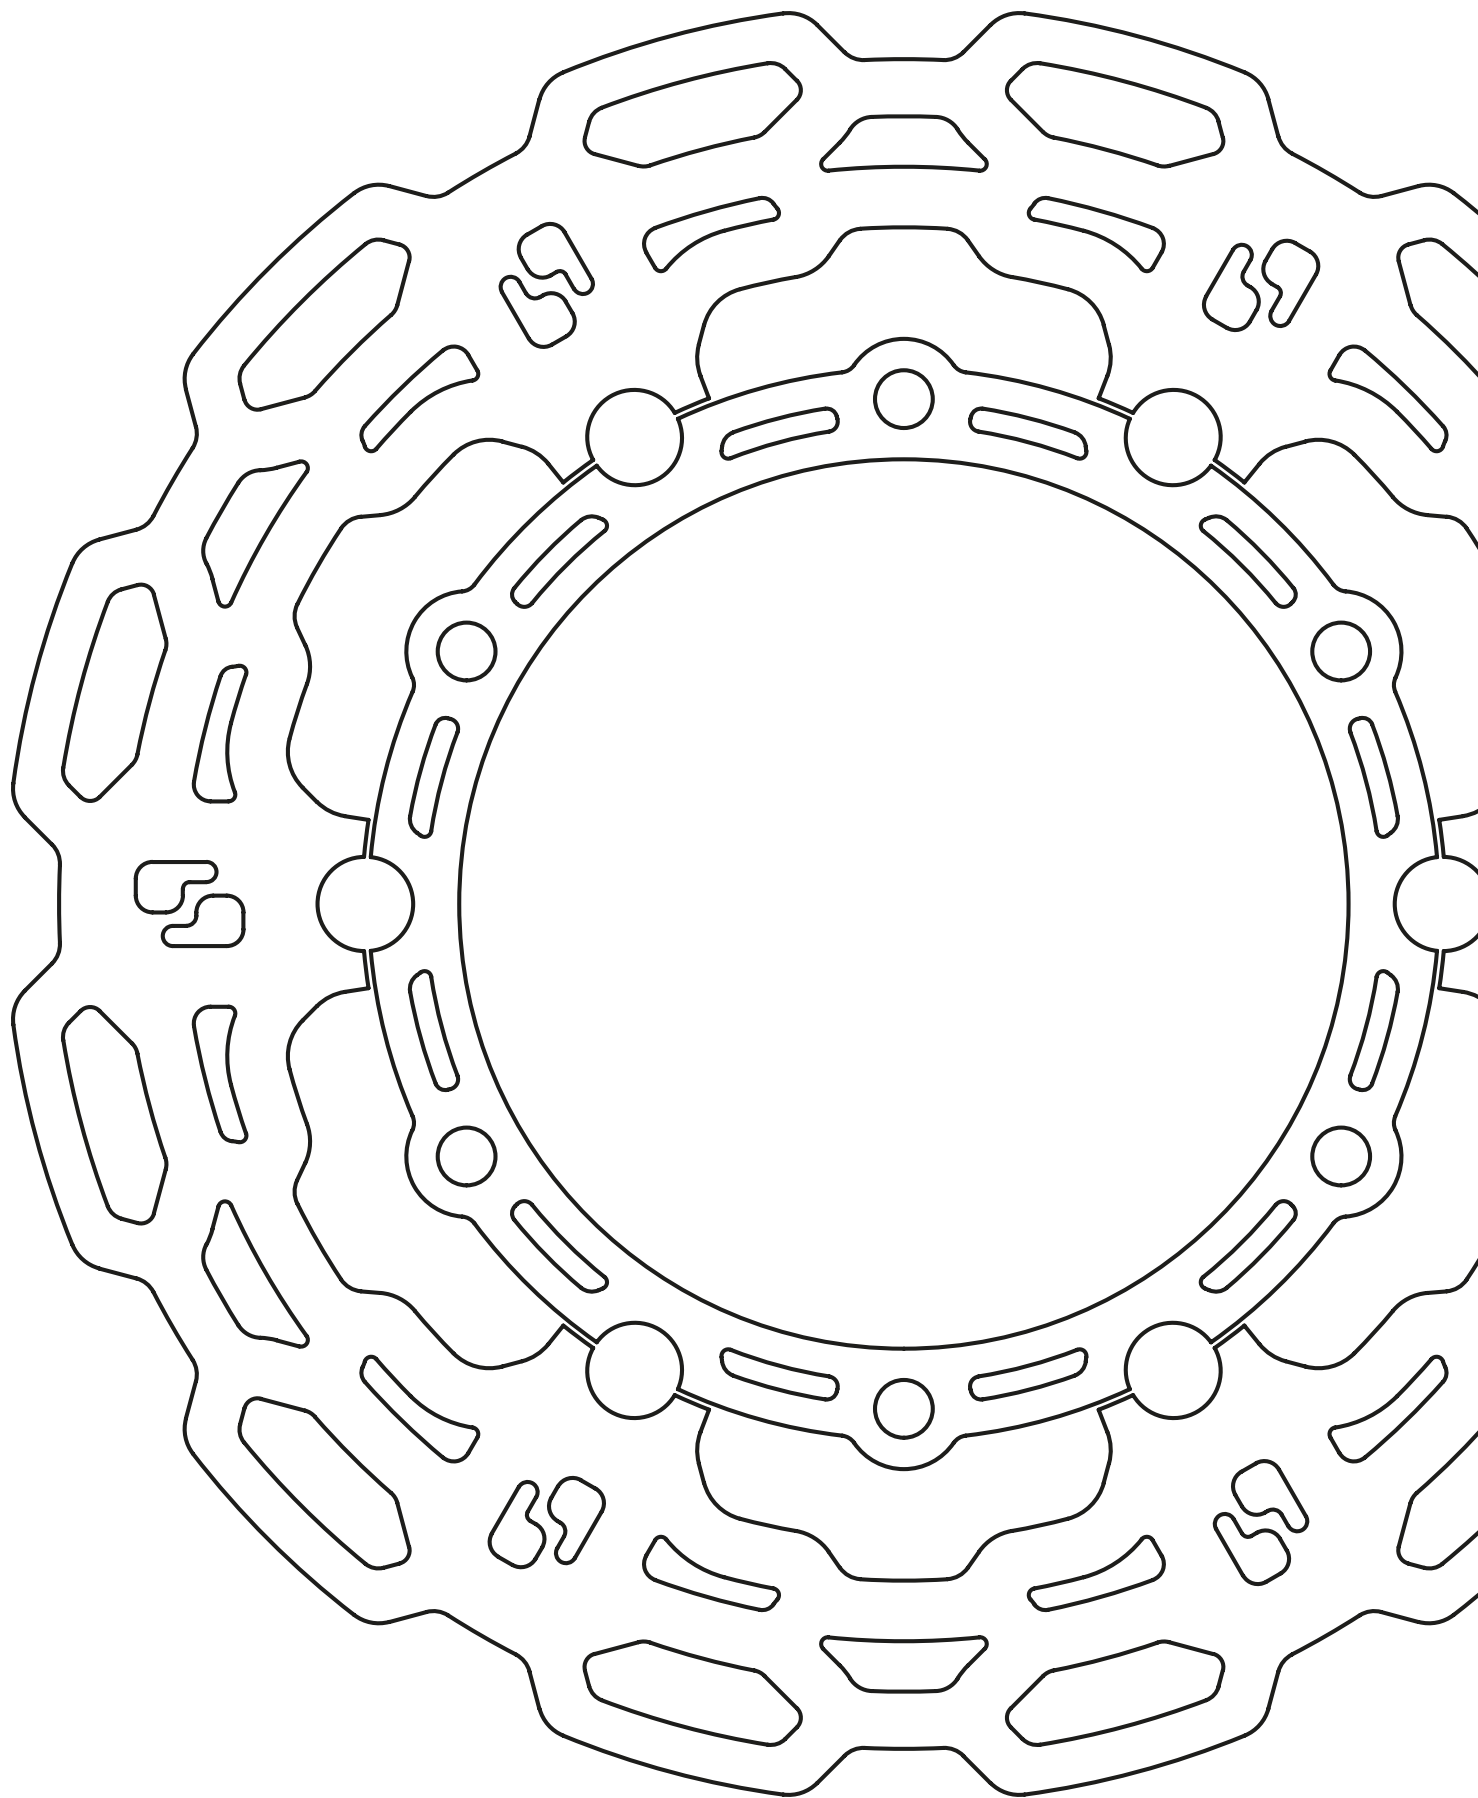

Capitalizing the know-how of more than 40 years in the motorcycle industry and the strong partnerships with major players in both the OEM and aftermarket industries, in 2005 the BRENTA brand was born.

In 2022 Endurance Overseas, the European holding company of the Endurance Group, launched a challenging 'made in Italy' industrial project in the two-wheels sector, acquiring Frenotecnica and its BRENTA brand, together with other brands and companies with a tradition in the production in Italy of performance components dedicated to motorbikes. Today, the brand introduces in its catalog a complete line of BRAKE DISCS dedicated to the SCOOTER world.

The modern production process makes it possible to optimize certain stages of disc machining, using quality materials (heat-treated AISI 420 steel).

The unique design ensures a reduced weight (thus lower flywheel mass) and significant resistance to axial deformation, resulting in no annoying vibrations and in optimal braking feel. The result is a product that has one of the most attractive price/quality ratios on the market.

The goal of offering a replacement with modular and progressive braking combined with excellent durability and consistency of performance has been achieved, and this is best appreciated when our brake discs are used with our original BRENTA brake pads.
