LA NOSTRA STORIA
ABOUT US

Frenotecnica nasce nel 1983 come piccolo laboratorio artigiano per la volontà di Silvano Stenech e di suo figlio Davide, ed in breve tempo diventa una vera e propria realtà produttiva, specializzata nella progettazione e realizzazione di materiali d'attrito innovativi, performanti e 100% MADE IN ITALY.

Lo stabilimento ha sede a Rovereto, e racchiude al suo interno tutte le competenze umane e tecnologiche per gestire internamente sia tutto il processo produttivo che lo sviluppo di nuovi ed innovativi materiali frenanti; al suo interno, infatti, troviamo sia un moderno reparto R&D che uno dedicato al controllo della qualità, necessario a garantire la massima sicurezza di tutti i prodotti realizzati.

Sfruttando il suo know-how di oltre 40 anni nel settore motociclistico e, grazie anche ad una solida collaborazione con i principali player del settore sia OEM che aftermarket, nel 2020 è nato il marchio BRENTA.

Nel 2022 **Endurance Overseas**, l'holding company europea del Gruppo Endurance, ha avviato uno sfidante progetto industriale «made in Italy» nel settore delle due ruote, acquisendo Frenotecnica ed il suo brand BRENTA, insieme ad altri marchi ed aziende con una tradizione nella produzione in Italia di componentistica performante dedicata alle moto. Il 1 gennaio 2025 nasce **Endurance Two Wheelers S.p.A.**

ENDURANCE TWO WHEELERS

Frenotecnica was established in 1983 as a small craftsman's workshop by Silvano Stenech and his son Davide, and in a short time it became a real production reality, specialising in the design and manufacture of innovative, high-performance and 100% MADE IN ITALY friction materials.

The plant is located in Rovereto, and includes all the human and technological skills required to internally manage both the entire production process and the development of new and innovative braking materials; in fact, there is both a modern R&D department and one dedicated to quality control, necessary to guarantee the maximum safety of all the products manufactured.

Capitalizing the know-how of more than 40 years in the motorcycle industry and the strong partnerships with major players in both the OEM and aftermarket industries, in 2020 BRENTA brand was born.

In 2022 ***Endurance Overseas****, the European holding company of the Endurance Group, launched a challenging 'made in Italy' industrial project in the two-wheel sector, acquiring Frenotecnica and its BRENTA brand, together with other brands and companies with a tradition in the production in Italy of performance components dedicated to motorbikes.*

On 1 January 2025, ***Endurance Two Wheelers S.p.A.*** *was founded.*

QUALITA' CERTIFICATA
CERTIFIED QUALITY

La qualità è sempre stata alla base di ogni prodotto a marchio Brenta costruito in Italia: ne sono prova tutte le certificazioni ottenute negli anni nel nostro stabilimento produttivo e per i nostri prodotti.

- KBA è l'acronimo di Kraftfahrt-Bundesamt, l'Ufficio Federale Tedesco per l'Automobile. Questo ente è responsabile dell'omologazione dei veicoli e dei loro componenti in Germania e, per estensione, in Europa, garantendo che i prodotti rispettino gli standard di sicurezza e ambientali stabiliti dalla legge tedesca sul traffico stradale.

- UNI EN ISO 9001 è una norma europea che certifica il rispetto dei criteri che un'organizzazione deve soddisfare per dimostrare di avere un sistema di gestione della qualità efficace.

- ECE R90 è una certificazione europea obbligatoria per i componenti dei freni di ricambio per veicoli a motore, che garantisce gli standard di qualità e le prestazioni per pastiglie freno, dischi freno e ganasce freno.

Quality has always been the cornerstone of every Brenta brand product manufactured in Italy: this is demonstrated by all the certifications obtained over the years for our production facility and our products.

- KBA stands for Kraftfahrt-Bundesamt, the German Federal Motor Transport Authority. This body is responsible for the type approval of vehicles and their components in Germany and, by extension, in Europe, ensuring that products comply with the safety and environmental standards established by German road traffic law.

- UNI EN ISO 9001 is a European standard that certifies compliance with the criteria that an organisation must meet to demonstrate that it has an effective quality management system.

- ECE R90 is a mandatory European certification for replacement brake components for motor vehicles, which guarantees quality and performance standards for brake pads, brake discs and brake shoes.

APPROVED KBA ABE GERMAN ROAD SAFETY DEPT.

ORGANIC ECE R90
Organic

Brenta vanta un'ampia gamma di pastiglie organiche che garantiscono performance durature, limitata usura del disco ed un'elevata modulazione di frenata. Le nostre pastiglie Serie 3 sono perfette per la maggior parte degli scooter in commercio e possono essere altrettanto valide per motociclette di media cilindrata destinate ad un uso cittadino e turistico.

Brenta has a wide range of organic pads that guarantee long-lasting performance, limited disc wear and high braking modulation. Our 3 Series pads are perfect for most scooters on the market and can be equally good for medium-displacement motorcycles intended for city and tourist use.

SINTERED ROAD ECE R90
Sintered

Ottenute attraverso il complesso processo di sinterizzazione, queste pastiglie sono adatte alle maxi moto stradali ed ai maxi scooter, dove le prestazioni ed i conseguenti stress sono elevati. La particolare tecnologia utilizzata per la produzione di questi prodotti garantisce un'eccezionale stabilità e durata delle performance. La specifica composizione della mescola offre un elevato coefficiente d'attrito sia a caldo che a freddo senza comportare un'eccessiva usura del disco.

Obtained through the complex sintering process, these pads are suitable for maxi road bikes and maxi scooters, where performance and resulting stresses are high. The particular technology used for the production of these products guarantees an exceptional stability and durability of performances. The specific compound composition offers a high friction coefficient both in hot and cold conditions without causing excessive wear on the disc.

PRO ROAD ECE R90
Sintered

Create con una particolare mescola sinterizzata, le pastiglie freno Pro Road sono altamente performanti anche a temperature estremamente calde o fredde, garantendo un'ottima frenata ed una limitata usura del disco. Queste pastiglie sono destinate ad un uso stradale sportivo, per questo sono realizzate con tecnologie più avanzate che ne garantiscono la massima efficienza.

Created with a special sintered compound, Pro Road brake pads are high-performance at extremely hot or cold temperatures, ensuring excellent braking and limited disc wear. These pads are developed for sports road use, for this reason they are made with more advanced technologies that guarantee maximum efficiency.

PRO OFF-ROAD ECE R90
Sintered

Ottenute attraverso il complesso processo di sinterizzazione, queste pastiglie sono adatte alle maxi moto stradali ed ai maxi scooter, dove le prestazioni ed i conseguenti stress sono elevati. La particolare tecnologia utilizzata per la produzione di questi prodotti garantisce un'eccezionale stabilità e durata delle performance. La specifica composizione della mescola offre un elevato coefficiente d'attrito sia a caldo che a freddo senza comportare un'eccessiva usura del disco.

Obtained through the complex sintering process, these pads are suitable for maxi road bikes and maxi scooters, where performance and resulting stresses are high. The particular technology used for the production of these products guarantees an exceptional stability and durability of performances. The specific compound composition offers a high friction coefficient both in hot and cold conditions without causing excessive wear on the disc.

CERAMIC RACING

RACE ONLY

Sintered

Sono la massima espressione tecnologica per uso “Racing” dove le moto moderne raggiungono performance elevatissime. Nate dall’esperienza acquisita sui vari circuiti internazionali, vengono utilizzate da molti team nel mondiale SBK con risultati importanti. Le nostre pastiglie infatti sono in grado di offrire una resistenza meccanica ed un coefficiente d’attrito superiore alle normali pastiglie presenti sul mercato, garantendo un’elevatissima potenza frenante anche nell’uso più esasperato tipico delle competizioni in pista.

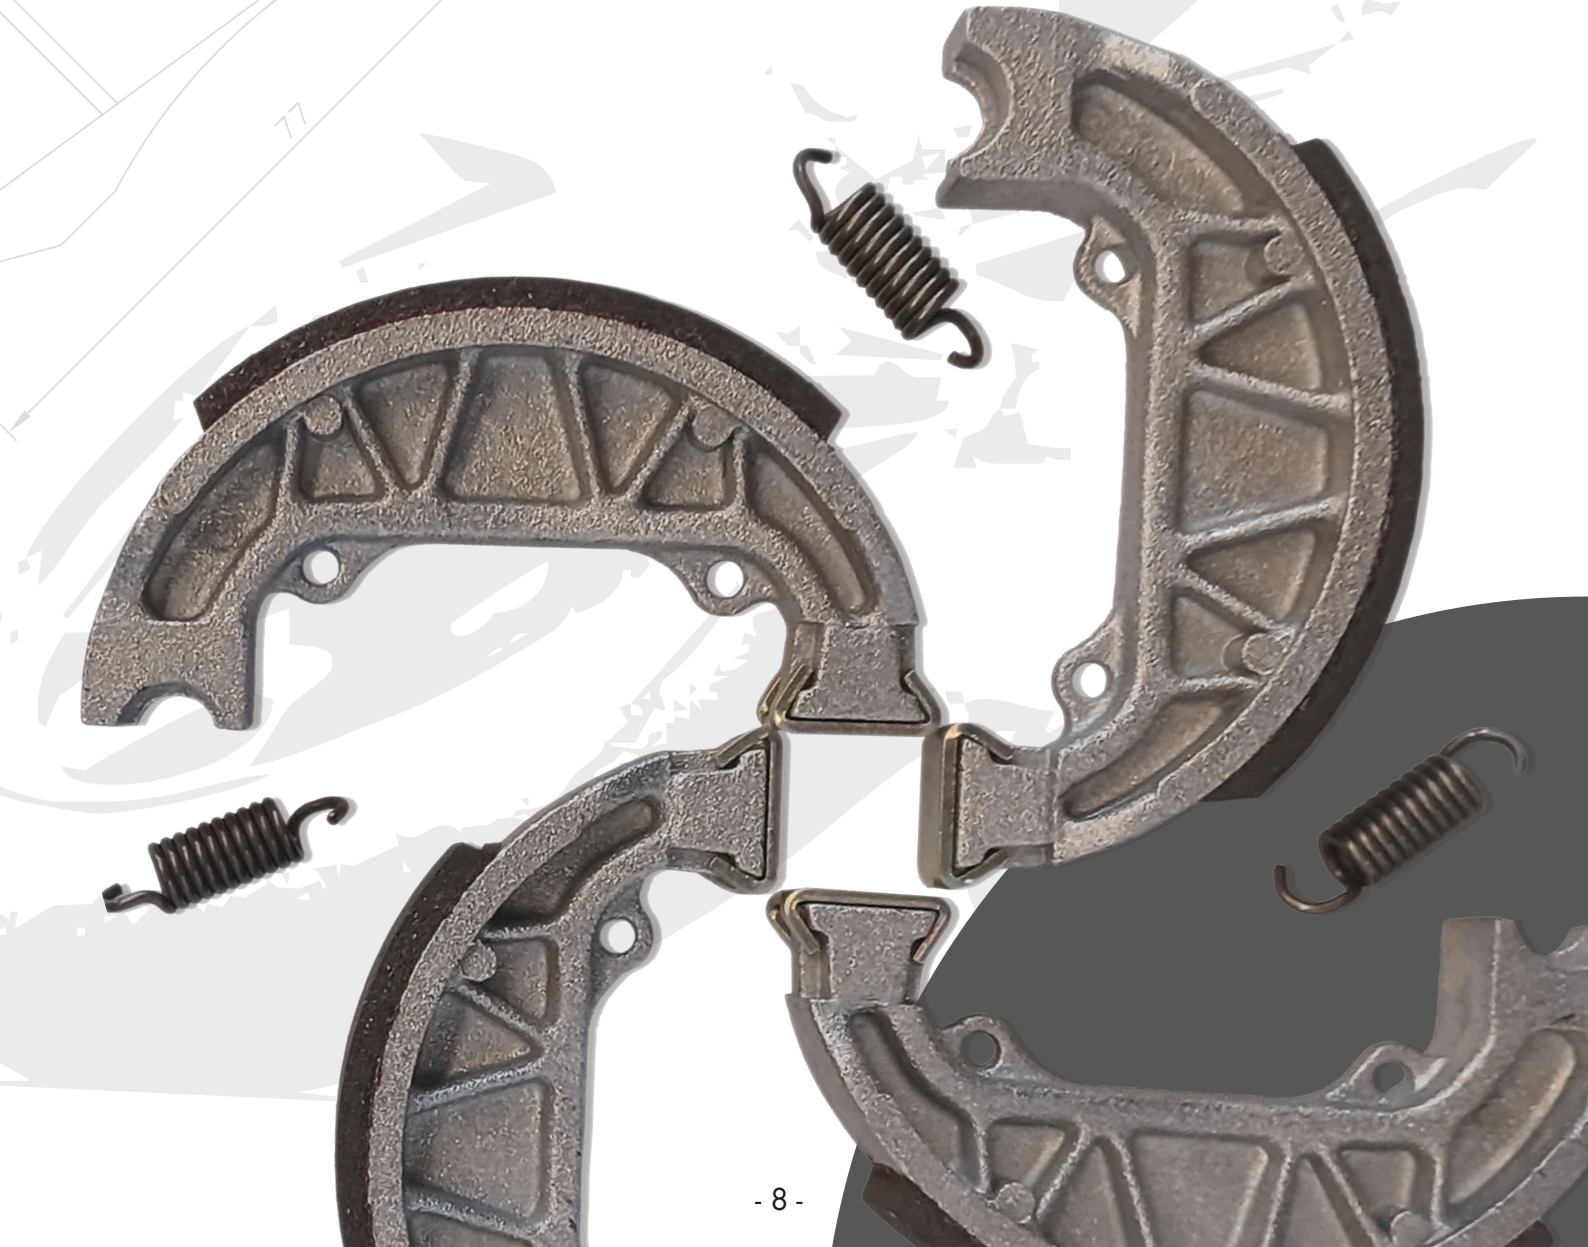

They are the highest technological expression for “Racing” use where modern motorcycles achieve extremely high performance. Born from the experience acquired on various international circuits, they are used by many teams in the SBK world championship with important results. In fact, our pads are able to offer mechanical resistance and a friction coefficient superior to the normal pads on the market, guaranteeing extremely high braking power even in the most extreme use typical of track competitions.

GANASCE FRENO
BRAKE SHOES

Le nostre ganasce sono completamente "MADE IN ITALY" e vengono realizzate con un'attenta lavorazione e cura in ogni dettaglio. Ciò si traduce in massima precisione nelle rettifiche ed utilizzo di materiali all'avanguardia che garantiscono al cliente un'elevata facilità e velocità di montaggio, ottime prestazioni complessive e nessun tipo di rodaggio.

Our brake shoes are completely 'MADE IN ITALY' and are manufactured with care and attention to every detail. Maximum precision in grinding and the use of state-of-the-art materials guarantee the customer ease and speed of assembly, excellent overall performance and no break-in.

FRIZIONI
CLUTCHES

La caratteristica principale delle frizioni automatiche per scooter è senza dubbio il mantenimento del coefficiente d'attrito, il quale permette una buona risposta anche nelle situazioni più impegnative.
Il comportamento alle alte temperature è un elemento essenziale per poter giudicare la qualità di una frizione ed è per questo che le frizioni automatiche Brenta sono state sottoposte ai più severi test su pista.
Da questa esperienza è stata sviluppata una variante "racing" che si caratterizza per l'impiego di centrifughe alleggerite che ne aumentano le prestazioni nelle condizioni più difficili.

The main characteristic of automatic scooter clutches is the maintenance of the friction coefficient for good response even in the most demanding situations.
High-temperature behaviour is an essential element in judging the quality of a clutch, which is why Brenta automatic clutches have been subjected to the toughest track tests.
From this experience, a 'racing' variant was developed featuring lightened centrifuges to increase performance in the harshest conditions.
